

To whom it may concern,

The Business Improvement Group specializes in providing services to clients that wish to take advantage of Scientific Research & Experimental Development (SR&ED) Tax Credit Program with Canada Revenue Agency.

What impressed us most about Lead Generators International (LGI) is the quality of their appointments and the intelligence they provided to us before each appointment. We attended appointments with the information we needed to get right to the heart of the business issues and the opportunities for our firm.

There are many low quality low cost competitors to LGI, but in our opinion what provided us with the most assurance is that they stood behind their campaign by guaranteeing the results of their campaign and efforts. In addition, they took the time to understand our business prior to making any calls.

My recommendation to anyone considering using LGI...do it!

Very sincerely,
