

To whom it may concern:

**Coastal Range Systems Inc.** has been named by Business in Vancouver (BIV) as one of the region's top ten fastest growing computer consulting firms. Partnerships with SAP®, IBM® and Microsoft®, offer Coastal Range Systems and their clients who include; BC Rail, ICBC and Nintendo the best possible choice for IT consulting.

Coastal Range retained Lead Generators International Sales & Marketing Group Inc. (LGI) to generate leads for the IBM SAP® Business One Solution, our premiere Enterprise Resource Planning (ERP) software and server package. Each minimum software license configuration is priced at over \$10,000. In addition, customers require services to support them with implementation and customization and most also need new computer equipment to deploy the system on. With the cumulative costs surrounding the installation, LGI has generated leads with a minimum potential sales value of over \$20,000 each.

We knew that we required a marketing firm that would be able to generate leads for a premium offering for medium sized businesses. After examining LGI's results guarantee and confirming the reference letters they provided, we decided to retain them.

We have extended LGI's contract and we are looking forward to more strong results. Engaging LGI has been a sound business decision and their contribution is very important to our overall business strategy.

Sincerely,

Stephen Loyd  
President
