

To Whom It May Concern:

Since our inception in 1986, my company, Aptech, has partnered with industry leaders in computer and imaging systems, consumables, technical services and solutions. We have provided more than 10,000 clients with the best that vendors such as Compaq/Hewlett Packard, IBM, Microsoft, Toshiba, Tektronix/Xerox, Symantec and others have to offer.

So when we went looking for a telephone lead generation service, we wanted the industry leader. And we found them in Lead Generators International.

LGI helped us with a Hewlett Packard campaign by generating leads for our sales staff to follow up on. HP was a key part of the process, and LGI more than met their rigorous standards.

In Montreal, we needed a caller with strong French skills. To make it in this market, your French must be impeccable. That's what we got with LGI. We were very pleased with the quality of our caller, and the leads generated have been helpful.

If we do telephone leads again, it will be with Lead Generators International.

Regards,
